

which device?

Not sure which device is right for your child?

We've developed this handy guide which shows you the recommended minimum specs to help you choose the right device.

THE BASICS

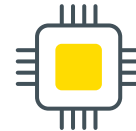

Screen

Must be comfortable for all day use

Hard drive

Windows minimum 64GB

RAM

Windows **at least** 4GB

Battery life

Ideally 8 hours to last through the whole day at school

Weight

Look for small and light devices to make it easy for your child to carry

Mil spec

These devices are purpose built, with a rugged chassis, water resistant keyboard and stronger hinges.

EXTRA INVESTMENTS

Protective case

Reduce the risk of damage, and help extend the life of your device.

Damage protection plan

for the ultimate peace of mind, you'll have everything covered especially those unfortunate accidents.

External keyboard

Use an external keyboard with a tablet for increased comfort and productivity

Touch screens

Supports different modes including drawing and hand writing with a stylus

Stylus

Supports drawing and handwriting which helps improve memory retention

Remember Before buying your device we recommend you check with your school to confirm the operating system they use or if they have specified any devices
